

Confirmation

The core business of the Lenzing Group is the manufacture of wood based cellulose fibers: TENCEL® branded lyocell fibers (generic name: Lyocell), Lenzing Viscose® branded fibers, Lenzing Viscose® COLOR fibers, Lenzing Modal® fibers, Lenzing Modal® COLOR and LENZING FR®

Compostability of Lenzing Modal® COLOR fibers

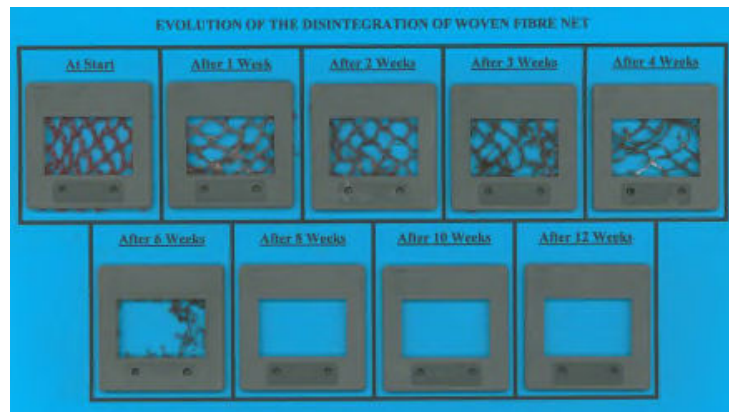

Lenzing Modal® COLOR are wood based cellulose fibers produced by the Viscose process.

Lenzing Modal® COLOR have been certified (home) compostable and biodegradable in soil conditions by the certification body **VINCOTTE** and have been awarded with the following labels:

Vegetable nets made of knit Lenzing Modal® COLOR

Vegetable nets made out of knit Lenzing Modal® COLOR fibers have been tested for qualitative disintegration at OWS (Organic Waste Systems, Report No RF.FHO-3 Rev00). In this compostability test the vegetable nets were buried in soil and checked once per week for the physical decay of the nets. The decaying process has been documented and made visible as shown in the picture below: In less than 12 weeks the vegetable nets made from Lenzing Modal® COLOR fiber were completely disintegrated.
